SUMMARY

Generative AI Engineer with 3+ years building production LLM systems, RAG pipelines, and multi-agent architectures on AWS. Architect of a reusable RAG platform deployed across 20+ government agencies serving 500K+ users. Hands-on experience with Claude (Anthropic) via AWS Bedrock including model evaluation, observability, and prompt orchestration. Technical lead mentoring 50+ engineers from prototype to production. MS in AI from Northeastern University.

EXPERIENCE

The Burnes Center for Social Change, Boston, MA Jul 2024 – Present

Generative AI Engineer | Technical Lead

- Architected **knowledge-agent-for-impact**, a reusable RAG platform (AWS CDK, Python, OpenSearch Serverless) adopted across **10+ production deployments** for state and municipal agencies, establishing shared LLM infrastructure.
- Built **ABE** (Assistive Buyer Engine) powered by **Claude Sonnet via AWS Bedrock**: RAGAS evaluation pipeline (faithfulness, relevancy, precision, recall), automated feedback-to-test-case generation, and CloudWatch observability (8 alarms, p99 latency, WebSocket monitoring).
- Led **A-IEP** (a-iep.org), a multi-agent document system with 7-stage AWS Step Functions pipeline (OCR, PII redaction via Comprehend, parallel AI analysis, 4-language translation) serving 1,000+ families.
- Developed **One-L**, a contract analysis tool using **Claude via Bedrock** with 11-stage Step Functions orchestration for conflict detection and redlining—**83% reduction** in legal review time. Won **2025 NASPO Cronin Gold Award**.
- Built production APIs (REST + WebSocket, JWT auth), DynamoDB (8 tables), S3 (6 buckets), CI/CD via GitHub Actions, and end-to-end KMS encryption across all deployed systems.
- Technical lead across **26 AI tools** for 20+ agencies; mentored 50+ engineers in GenAI architecture, RAG design, prompt engineering, and AWS deployment—bridging research to production at scale.

The Burnes Center for Social Change, Boston, MA Jan 2024 – Jun 2024

GenAI Product Development Co-op

- Launched **GENIE**, a secure multi-model AI sandbox (Claude, Titan, Mistral) with side-by-side comparison and smart model routing—adopted by **44K+ state employees** across 8+ MA departments. Presented to the Massachusetts Governor.
- Designed Smart Model Selector (Lambda + API Gateway) routing queries across 14 models by task, cost, and tokens—cutting costs by **40%**. Benchmarked latency, cost, and instruction-following with in-house evaluation frameworks.
- Built reusable CI/CD RAG pipeline with LangChain, improving retrieval accuracy by 20% and reducing hallucinations by 40%.

Acharya Institutes, Bangalore, India Sep 2021 – Aug 2023

Software Engineer (Flutter)

- Built cross-platform ERP app in Flutter for **20K+ daily users**; elevated app store ratings from 1.2 to 4.5.

We Source Company, Remote, India May 2021 – Sep 2022

Machine Learning Intern

- Engineered CNN-based fraud detection model (**87.34% accuracy**, 103ms latency); built 2 Flutter delivery apps.

SKILLS

- LLM/ML:** Claude (Anthropic), AWS Bedrock, OpenAI, LangChain, RAG, RAGAS, Prompt Engineering, Multi-Agent Orchestration, AWS Step Functions, PyTorch, TensorFlow
- Cloud:** AWS (Lambda, S3, DynamoDB, Cognito, API Gateway, CloudFront, KMS, Comprehend, OpenSearch, CDK), CI/CD, GitHub Actions, Docker, CloudWatch
- Lang/Data:** Python, TypeScript, JavaScript, Java, C++, SQL, PostgreSQL, Pinecone, FAISS, Neo4j, React, Claude Code

EDUCATION

Northeastern University, Boston, MA — M.S. in Artificial Intelligence (GPA: 3.83) Dec 2024

Acharya Institute of Technology, Bangalore, India — B.E. in Computer Science Jul 2022

PROJECTS & AWARDS

VCT Scout — AWS x Riot Games Hackathon Dec 2024

- GenAI assistant (AWS Bedrock Agents) analyzing 1TB+ game logs. **2nd / 3,300+ teams**; Best Cross-Regional Team; \$8K + \$8K AWS credits.

NASPO Awards — One-L + ABE Procurement AI 2025

- **Cronin Gold Award + Academic Collaboration Award** from National Association of State Procurement Officials for statewide AI procurement modernization in Massachusetts.
